

IST-Focus “Death, birth & womb spaces”

Sunday 24. February – Sunday, 3. March 2019
in Erbach, Germany (near Frankfurt)

This Focus course uses the IST-technique in the context of death and incarnation. Explore states of consciousness of the afterlife journey, as well as spaces related to the process of incarnation. Talks and presentations will cover theoretical aspects around the topic of death and the subtle body processes involved, the different stages of the afterlife journey and the incarnation process. Our motto "the practices of life, are the practices for death" will guide the way for this course, since we will also be working on how to deepen your meditation and IST-experiences.

A good preparation for this course would be to work with the Death KT beforehand. Or do it if you haven't. It's not mandatory to have done the Death KT to participate in this course (the pre-requisite is one IST-101 course) however studying the material will be helpful to you during the course.

We will have a standard Clairvision intensive-schedule, starting with a meditation together at 08:30am and finishing by 22:00 in the evening. The final schedule will be announced at the onset of the course. Each day there will be an IST-session-exchange in the morning and afternoon, totaling 4 individual IST sessions per day, there will also be vision practices in pairs on a daily basis.
